## Automatic DNA/RNA Extraction System

- High Efficiency**  
 New-designed holomagnetized rods and dynamical adjustable amplitude technology ensures no magnetic beads residual ordetaining on the tube sides, suitable for all kinds of micro-sized magnetic beads.
- High Temperature Accuracy**  
 Enhanced encapsulated deep-well heating block significantly increases temperature control accuracy, improves efficiency of lysis and elution.
- High Safety**  
 Disposable 24/46/96-strip plastic sleeves and UV light prevent aerosol cross contamination between different batches of reagents and ensure the safety during experiments.
- Flexible Processing Capacities**  
 24/48/96/192-wells modules are exchangeable to meet different demands by experiments. Max. processing volume up to 6000uL.
- Multi-mix Model**  
 3 kinds of amplitude, 6 levels of frequency adjustable, which are according to different samples and extraction kits to improve extraction efficiency.
- Standardization**  
 Multiple programs can be edited and preset experiment templates to ensure experiment conditions with excellent uniformity and reproducibility.
